PROFESSIONAL SUMMARY

B.E. Computer Science and Engineering student with a current CGPA of 8.23, building a foundation in Java, Python and web development. Hands-on experience through Python, web development and Java internships, along with projects in security, data processing and web applications. Currently strengthening Data Structures and Algorithms in Java and developing full-stack projects for software placement preparation.

TECHNICAL SKILLS

Languages: Java, Python, C

Web: HTML5, CSS3, JavaScript

CS Fundamentals: Object-Oriented Programming, Data Structures & Algorithms, DBMS

Tools: Git, GitHub, VS Code

Soft Skills: Problem Solving | Teamwork & Collaboration | Adaptability | Continuous Learning | Communication

INTERNSHIP EXPERIENCE

Python Programming Intern — CodeAlpha

July 2026

- Completed Python internship projects including Hangman, Stock Portfolio Tracker and Mail Extractor.
- Applied Python programming concepts including file handling, data processing and regular expressions.
- Maintained project work in GitHub repositories and prepared project demonstrations/documentation.

Web Development Intern — Vaizai Solutions

June 2026

- Completed a 20-day Web Development training/internship at Kinathukadavu.
- Worked with HTML, CSS and JavaScript to build and understand responsive web pages and interactive features.
- Strengthened practical understanding of frontend web development through hands-on tasks.

Java Development Intern — Emglitz Technologies

January 2026

- Worked on Java programming with focus on core programming and Object-Oriented Programming concepts.
- Practised Java problem solving and strengthened programming logic through hands-on exercises.
- Built familiarity with Java as a foundation for software development and placement preparation.

TECHNICAL PROJECTS

CivicFix — AI-Powered Public Issue Reporting & Management

Full-Stack Web Application | Ongoing

- Developing a platform where citizens can register public issues and track complaint status such as Reported, In Progress and Solved.
- Building the frontend with a citizen-facing complaint flow and an authority dashboard for managing reported issues.
- Planned functionality includes photo/location capture, issue classification, severity/risk assessment and report-based prioritization.

Smart ATM Security System with Multi-Level Alerts

Python | OpenCV

- Developed a security-focused ATM concept with multi-level alerts for suspicious access attempts.
- Implemented repeated-failed-PIN handling with automatic card blocking and security alert logic.
- Integrated suspicious-user image capture and real-time SMS alert functionality as part of the security workflow.

Stock Portfolio Tracker

Python | Data Processing

- Built a Python application to record investment holdings and calculate portfolio value/yield and key financial metrics.
- Generated structured summaries from user-entered investment data for easier portfolio tracking.

Mail Extractor & Text Analyzer

Python | Regular Expressions

- Built a mail extractor that identifies valid email addresses from unformatted text using regular expressions.
- Developed a text analyzer to report word counts, sentence lengths, vowel distribution and frequency information.

EDUCATION

B.E. Computer Science and Engineering — V.S.B. College of Engineering Technical Campus, Coimbatore

2024–2028

CGPA: 8.23 / 10.0 (current)

Class XII — R.G. Matriculation Higher Secondary School, Udumalpet — 83%

2024

Class X — Lourde Matha Convent Matriculation Higher Secondary School, Udumalpet — 89%

2022

CERTIFICATIONS & LEARNING

- HP LIFE — Critical Thinking in the AI Era
- Infosys Springboard — Cyber Security Fundamentals (Certificate of Achievement)
- Infosys Springboard — Basics of Python (Training Certificate)
- Data Structures & Algorithms practice in Java through LeetCode
